

With the growth in internet technologies, buyers and sellers are well informed; they are demanding and have high expectations. Now, using our services, you can leverage the same technologies that empower your buyers and sellers to meet their expectations. Keep in mind that your competition is only a few clicks away from your customers.

Our web site solutions are inexpensive and put you in the driver seat. They are easy to use and we can help you get started. We can also work with you to customize our solutions for your specific needs. Contact us for a demo of our services and decide for yourself.

- On-line monthly calendar generator

Manage your own web site

Password protected management area

The management area is a set of password protected web pages that is exclusively provided for you to manage your web site.

Add new, modify, or delete listings

Once you are logged in, use a simple web form to manage your own listings, add an audio clip, a video clip, a brochure, and a thumbnail picture, and manage open house information.

Compare listings

Visitors to your site can compare key features of several properties on a single page.

Request showing

Buyers can fill out a simple form and request a showing of any active property. Requests will be emailed to you.

Personalized web site

Choose a template or customize

Choose from a selection of templates with the logo and colors of your brokerage firm. Or, we can design a customized web site, one that is just for you.

Property listings

On the web site, your site visitors can narrow their search by towns. They can also select properties for comparison, view an interactive map for each listing, request showing, and much more.
